Citizens' Committee for Children of New York

Ensuring that every child is healthy, housed, educated, and safe.

Since our founding in 1944, CCC has partnered with other experts in children's advocacy to inform, educate, and advocate for change. This approach to child advocacy has proven time and again to encompass the best features of public policy research with a tradition of citizens activism.

Our work focuses on identifying the causes and effects of vulnerability and risk, recommending solutions to ease children, and their families, fear, and making certain that public policies, legislation, budgets, programs and services are responsive to the needs of children. We advance recommendations that are designed to effectively eliminate barriers, combat disparities, and create opportunities, so that it is possible for all children to grow into adulthood ready to meet the demands of society and fully engage in the 21st century economy.

By casting light on the facts, holding civic discourse and engaging advocates and allies in building solutions, CCC mobilizes New Yorkers to get elected and appointed officials to listen, to act, and to make New York City a better place for children.

Our work aims to:
• Enhance the Well-Being and Quality of Life of Children
• Increase Opportunities for Achievement and Success
• Shore Up the Safety Net for Children and Families
• Advance Policies that Support Working Families
• Ensure that Public Policies, Legislation, Budgets, Programs, and Services Are Responsive to the Needs of Children
